

Higher protection for FX exposures at usually lower costs

HedgeGo's FX intelligence always suggests 100% hedging in critical time periods and avoids hedging in uncritical periods. Compared to permanent 80% hedging it offers higher risk protection at usually lower average costs.

Treasury becomes active

Following the suggestion of the FX Intelligence to end hedging and wait for further suggestions

2 Active risk management

If trend changes, **Loss Protection Orders (LPOs)** suggest to start hedging, avoiding losses from bad developments

LPO-enter

Always protected, hedged only when needed

Treasury becomes active

Following the suggestion of the FX Intelligence to activate 100% hedging

If trend changes, **Loss Protection Orders (LPOs)** suggest to end hedging, avoiding unnecessary costs

1 Active cost management
